DETAILED ACTION

1. This communication is in response to applicant's 8/19/2005 Amendment.

Claims 1-15 and 25-33 are cancelled. Claims 16-24 are pending.

Examiner's Amendment

2. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Van Ernest on 11/8/2005.

The application has been amended by the examiner and the applicant as the following.

Claim 16 lines 6 and 7:

“at least one of service policy and logic” has been replaced by ***“information relating to the permitted setup, and service policy or logic representing service capabilities or service permissions,”***.

Allowable Subject Matter

3. Claims 16-24 are allowed.

The following is an examiner's statement of reasons for allowance.

The subject matter of claims 16-24 is allowable over prior art of record, because all prior arts fail to teach or suggest a service controller provides the initiating end system with an enabling certificate, comprising ***information relating to the permitted setup, and service policy or logic representing service capabilities or service permissions***, associated with the network service, and a unique setup identifier, and further instructs the initiating end system to perform a connection setup request that includes the certificate and the unique identifier.

The prior art also fails to disclose the step wherein the ***processing the connection setup request is further based on the certificate***; and wherein ***the performing one of establishing a network connection and rejecting the connection setup request is in further accordance with the certificate***, as recited in the claims.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Gallant et al. (U.S. Patent Application No. 20030133454) discloses a method and a system for providing quality of service in an IP telephony session between a calling party and a called party establishes a high quality of service ATM virtual circuit for the session between first and second devices, each of the devices having ATM capability and IP capability.
